25X1

25X1

Comments.

- (1)
- (2) This westbound empty grain shuttle train indicates that the East German grain import program which was started in January 1952, is essentially completed.
- (3) Raw material deliveries for the Foundry Combine East near Fuerstenberg on the Oder River.
- (4) Deliveries by East German hydrogenation plants to the U.S.S.R. and returning empty tank cars.
- (5) A large ammunition depot of the GDRG is located in Kapen.
- (6) Refrigerator cars operating between the U.S.S.R. and East Germany.

- (7) These shipments are connected with the motor vehicle replacement program.

Until 14 August 1952,

a total of 3,373 new motor vehicles arrived in Eastern Germany.
 (8) A large ordnance and equipment depot of the GDRG is located in Jessen.
 (9) From the weight of these crates it is believed that they contained jet fighters. In late July, the bomber regiment stationed at Cottbus airfield moved to Jueterbog. It was anticipated that the field would be reoccupied.

- (10) Deliveries by East German railroad car factories to the U.S.S.R.

The Soviet gauge wheel sets sent along will be used on the Soviet railroad system.

- (11)
- (12) The dispatch to the U.S.S.R. of empty heavy-duty flatcars indicates that new tanks will arrive in East Germany soon.

The new Rlyn-type cars can carry two tanks each.

- (13) The shipments dispatched to Guestrow were probably for the former German Army ammunition depot in Guestrow-Friemerwald. This ammunition depot, was occupied by the Soviets at the end of the war, vacated in late 1949 and occupied by Volkspolizei (VP) in January 1950. A VP tank school and a large tank repair shop are located there. The ammunition shipment to Prenzlau was probably also for VP, possibly for the 1st VP corps or army which is being activated in this area.
